EL601 sound module 1+N

Reference: EL601
Product code: 11818601
EAN code: 8429898020952

Main characteristics

- For Nexa push buttons door panels
- 1+n analogue installation
- For systems with one access door only
- Maximum 32 telephones
- Sound module with independent door panel and telephone adjusting level volume
- Removable terminal connector for easy wiring
- Connection to push button modules using small flat cables provided with the modules
- Includes two push buttons
- Recommended for replacing Bitron 1+N modules

More information

- The necessary components for a 1+n system with one access are:
- Use an EL601 sound module.
- When systems with more than 2 push buttons, order as many EL611A analog push buttons electronic modules as required for the panel. In case of panels with more than one horizontal module, use one RAP-611A link cable for each additional horizontal module.
- Use call telephones with 1+'n' AV1407/004 , AV1407/002 installation according to the sound module call type.
- A TF-104 transformer will be required for the door panel.
- Use a 12V a.c. lock release.

Accessories

- EL611A ANALOG BUTTONS MODULE.
