EL650 sound module

Reference: EL650
Product code: 11818650
EAN code: 8429898030746

Main characteristics

- 4+n analogue installation for Nexa push buttons door panels
- Maximum 32 push buttons
- Maximum number of elements per apartment:
  - Up tp 12 apartments: Maximum 3 elements (T-500/Call Repeater)
  - Between 13 and 32 apartments: Maximum 2 elements (T-500/Call Repeater)
- For systems with one access door only
- Sound module with independent door panel and telephone adjusting level volume
- Removable terminal connector for easy wiring
- Electronic call or buzzer with acoustic acknowledgement signal
- Connection to push button modules using small flat cables provided with the modules
- Includes two push buttons

More information

The **necessary elements** for creating an analogue system with a 4+n installation and a single access point are:

- Use an EL650 sound module
- For equipment with more than two push buttons, add EL610A analogue push button modules (maximum 3 modules) until the desired number of push buttons is obtained (maximum 32 push buttons). For panels with more than one horizontal module, use a long RAP-610A connection cable for each additional horizontal module.
- Use T-500 telephones with 4+n installation.
  - Up to 12 dwellings: Maximum 3 elements (telephones/doorbells) per dwelling.
  - Between 13 and 32 homes: Maximum 2 elements (telephones/doorbells) per home
- Use a TF-104 transformer for the board.
- Use **12V AC electric door openers**
- Use NEXA ALUMINIUM or NEXA INOX

Accessories

- RAP-610A link cable
