EL655 sound module

Reference: EL655
Product code: 11818655
EAN code: 8429898010250

Main characteristics

- For Nexa push buttons door panels
- 4+n analogue installation
- For systems with one access door only
- Sound module with independent door panel and telephone adjusting level volume
- Removable terminal connector for easy wiring
- Electronic call or buzzer with acoustic acknowledgement signal
- Connection to push button modules using small flat cables provided with the modules
- Includes two push buttons

More information

The **necessary components** for a 4+n system with one access are:

- Use an EL655 sound module.
- When systems with more than 2 push buttons, order as manyEL610A analog push buttons electronic modules as required for the panel. In case of panels with more than one horizontal module, use one RAP-610A link cable for each additional horizontal module.
- Use electronic or buzzer call telephones with 4+'n' installation according to the sound module call type. **The maximum number of units inside the same apartment is three.**
- A TF-104 transformer will be required for the door panel.
- Use a **12V a.c. lock release.**
